Summary

Professional Summary:

I have delivered large-scale Software, Enterprise Web Application, BI, ETL and Mobile (Android & IOS) projects on time under budget by effectively leading, collaborating and Guiding Cross functional Dev teams for around 14+ years. Capable of keeping Cross functional Development teams focused and delivering success in rapidly evolving dynamic environments. I also have extensive Software Development and Testing Experience. I have good hands-on experience in Java, React, SQL, PowerBi, Pentaho, PowerShell, Selenium ,Git,Jenkins, Jira, Confluence, Big Picture and Rally. I am a Certified SAFe 5 Program Consultant (Helps in Managing Large Enterprise Programs). This makes me one among the 376 Certified SAFe Program Consultants in India & 5717 Globally.

- 14+ Years of Good and Diversified experience in Product Development, Technical Program Management, People management, Product management, Release Management and Test Management across different Domains
- Played key role in Delivering large Programs by building new teams and putting in place system/processes that helped team grow in number and expertise. Demonstrated leadership skills to manage and deploy medium and Large-scale projects successfully. Proficient and result oriented Technical Program manager
- Received multiple awards for Successfully delivering Programs.
- Certified SAFe 5 Program Consultant
- Highlight and communicate risks/Dependencies to partners (Effective Risk Management Strategies)
- Creating Program Plan, Negotiating scope, timelines, and roadmaps
- Active participation during Architectural Reviews
- Worked extensively in Waterfall and Agile Methodology (Scrum/ Kanban/SAFE)

- Good Experience with all aspects of Software Development Life Cycle (SDLC) and Devops Practices
- Been SME for Process/Products/Technologies
- Experience in Leading a Program which had 9 Scrum Teams (70+ Members)
- Managing client interactions and co-ordination with interfacing teams and providing end to end solution delivery
- Driving the Program through right milestones and OKR's with MVP approach
- Experience in building dashboards using Power BI and Confluence to Show the Program Health and Status
- Expertise in Multiple Domains(Retail/Banking/HRMS/Telecom/Fintech)
- Good Experience in writing SQL query
- Experience in Writing Powershell Scripts
- Done successful Enterprise Agile Transformation (SAFe Implementation) in challenging projects and Played RTE role for the first ART as part of SAFe implementation.
