Venkat Thiagarajan

Full Stack Engineer | JP Morgan & Chase | Security Services and Transfer Agency
Chelmsford, England, United Kingdom

Summary

As a seasoned Full Stack Engineer with 14 years of experience in the retail and investment banking sectors, I have acquired a wealth of knowledge and expertise. Throughout my career, I have successfully tackled diverse challenges, developing comprehensive solutions and delivering high-quality results.

My skills span the entire stack, from front-end development using modern frameworks such as React, Angular, and Vue.js, to back-end development utilizing technologies like Java, and Node.js. I am well-versed in working with relational and NoSQL databases, designing and implementing RESTful APIs, and integrating external systems and services.

In the banking industry, I have gained valuable insights into complex financial systems, regulatory compliance, and security protocols. I have a deep understanding of data privacy, transaction processing, and real-time financial data management.

Driven by a passion for continuous learning, I am constantly expanding my skill set to include technologies like CI/CD automation, Containerisation, Serverless architecture, and cloud-based hosting solutions. I am well-versed in utilizing Amazon Web Services, Firebase, and Azure to provide scalable and reliable hosting environments for web applications.

Working within Agile Scrum teams has been a fundamental aspect of my professional journey. Following Agile principles, I have consistently delivered value to the business through periodic iterations and maintaining a collaborative work environment.

Experience

JPMorgan Chase & Co.
Associate Software Engineer
March 2022 - Present (3 years 4 months)
London, England, United Kingdom

In my current role, I have successfully undertaken various key responsibilities, including:

- * Collaborating with Business Analysts to understand and design project requirements.
- * Developing end-to-end functionality, encompassing front-end development using ReactJs and back-end services using Java 17.
- * Writing integration tests using Selenium and Cucumber to ensure robust and reliable application performance.
- * Managing deployment processes utilizing hybrid cloud technologies.
- * Facilitating seamless integration with external vendors to enhance application capabilities.
- * Effectively managing dependencies to ensure smooth development and deployment cycles.

These responsibilities highlight my ability to engage with stakeholders, deliver comprehensive solutions, and manage various aspects of the development lifecycle. By leveraging my expertise in both front-end and back-end technologies, I consistently strive to create efficient and reliable software solutions.
