Vanitha Renganathan

Full stack Azure Developer | DevOps Enthusiast | .Net Expert
Royal Tunbridge Wells, England, United Kingdom

Summary

Hello! I'm Vanitha Renganathan, a seasoned Full Stack Developer
with over 13 years of experience in the tech industry. Currently
based in the UK as part of an on-site assignment with TCS, I'm
actively seeking fresh avenues to channel my expertise and drive
digital innovations.

As a Technical Lead, I've successfully orchestrated projects that
span the entire development spectrum. From conceptualization
to deployment, I'm well-versed in guiding teams and ensuring the
seamless integration of front-end and back-end technologies.

On the front-end, I'm skilled in leveraging the power of Angular and
ReactJS to create immersive user interfaces that captivate and
engage. My proficiency extends to back-end technologies as well,
with expertise in .NET Framework and .NET Core. Whether it's
building robust APIs with Web API or architecting scalable solutions
with MVC, I've got it covered.

Data is at the heart of every application, and I've mastered SQL
Server to effectively design and manage databases that underpin
reliable data-driven applications.

As a cloud enthusiast, I've harnessed the capabilities of Azure to
their fullest. My toolkit includes Azure Active Directory, Data Factory,
App Service, Web Jobs, Function App, Storage Account, Service
Bus Topics, and Application Insights for comprehensive monitoring.

DevOps is not just a buzzword for me; I've streamlined development
pipelines with Git, YAML, ARM templates, and PowerShell scripts.
This ensures that my projects are not only code-perfect but
deployment-ready.

I'm passionate about delivering solutions that bridge the gap
between cutting-edge technology and real-world business needs.

If you're seeking a Full Stack Developer who can navigate every layer of the development stack, let's connect and explore the exciting possibilities ahead!
