Imamuddin Shaik

Full-Stack Developer with 3+ years building scalable web apps using React.js, Node.js, & Python. Skilled in REST APIs, cloud (AWS, Azure, GCP), Agile, CI/CD, microservices, serverless & testing (Jest, Cypress)

London Area, United Kingdom

Summary

Full-Stack Developer with 3+ years of experience in scalable web application development using React.js, Node.js, and Python. Proficient in designing RESTful APIs, cloud deployments (AWS, Azure, GCP), and responsive UI components. Experienced in Agile methodologies and CI/CD pipeline automation. Familiar with micro services architecture, serverless computing, and testing frameworks like Jest and Cypress. Proven ability to optimize application performance and deliver secure, user-friendly solutions in e-commerce and other domains

Tech Stacks

Node.js, React.js, JavaScript (ES6+), TypeScript, Express.js, Python, Django, Flask, .NET, Angular, Vue.js, MongoDB, Mongoose, MySQL, SQL Server, PostgreSQL, Firebase, AWS (EC2, S3, Lambda), Azure, GCP, Git, Docker, Kubernetes, Jenkins, CI/CD Pipelines, RESTful APIs, GraphQL, Serverless Computing, Microservices, OAuth, JWT, Jest, Mocha, Cypress, Tailwind CSS, Next.js, Redux Toolkit, React Bootstrap, React Context API, Socket.IO, bcrypt, Appwrite, React Hook Form, TinyMCE, Vite, Material-UI, Cloudinary, Multer, dotenv, LSTM, VADER, TextBlob, Pandas, NumPy, scikit-learn, NLTK, spaCy, yfinance, TensorFlow/ Keras, Matplotlib, Seaborn, Frontend Development, Backend Development, Post Management, Problem Solving, Twitter, Data Collection

---

Experience

ZenithWave Capital
Founding Full Stack Developer
January 2025 - Present (6 months)

As the founding full stack developer, I'm building and scaling ZenithWave Capital, a startup trading-focused platform delivering advanced financial education, trading tools, and fintech services. I've led the design, development, and deployment of multiple platforms to support course delivery, trading evaluations, and user engagement.

Roles and Responsibilities:
• Designed and developed the entire zenithwavecapital.com architecture using Next.js, React, Tailwind CSS, and the MERN stack.
• Created dynamic pages: homepage, about, programs, legal, contact, and policies, with Firebase Functions for secure contact form handling and CORS setup.
• Launched and customized the LMS platform (learn.zenithwavecapital.com) on LearnWorlds Pro Plan with courses, webinars, affiliate programs, coupons, blogs, Zoom, Stripe, and email marketing.
• Built backend logic with Firebase (Auth, Firestore, Cloud Functions) and visual management via Rowy.
• Developing a custom LMS backend to replace LearnWorlds, with scalable database design, user tracking, and admin tools.
• Working on dashboard.zenithwavecapital.com (trading management) and admin.zenithwavecapital.com (user, revenue, system controls).
• Writing code to integrate a chatbot into the main website for enhanced engagement and automation.
• Established GitHub CI/CD pipelines for continuous integration, automated testing, and seamless deployment.
• Implemented end-to-end tests using Playwright and unit tests with Jest, ensuring robust code quality.
• Integrated error tracking and performance monitoring with tools like Sentry (planned) for proactive issue resolution.
• Ensured mobile-first, responsive designs with smooth animations and intersection observer effects.
• Maintained code quality using ESLint and Prettier, and followed agile practices with ClickUp task management.

Radical AI
Full Stack Developer
May 2024 - February 2025 (10 months)
London Area, United Kingdom

• Designed high-performance web applications using React.js, Next.js, and TypeScript, with a focus on scalable e-commerce solutions.
• Designed a modular onboarding interface with React.js and Material-UI, increasing user engagement by 25%.
• Developed robust RESTful APIs and integrated GraphQL services to streamline data exchange and support dynamic application features.
• Enhanced application performance by 35% through custom React hooks, memoization, and state management optimizations.
• Implemented secure authentication using Firebase and OAuth, ensuring data protection and seamless user access for 10k+ users.
• Automated cloud deployments on AWS using CI/CD pipelines (Jenkins, Docker, Kubernetes), reducing downtime by 30% and ensuring rapid release cycles.
• Collaborated closely with UI/UX designers to ensure accessibility, mobile-first design, and cross-browser compatibility—boosting SEO performance by 40%.
Tech Stack: React.js, React Hooks, Next.js, Typescript, AWS, Firebase, OAuth

Dot Net Technologies
Full Stack Developer
January 2023 - January 2024 (1 year 1 month)
London Area, United Kingdom

• Developed enterprise-grade web applications using C#, ASP.NET MVC, and SQL Server, focusing on robust back-end architecture.
• Engineered dynamic forms with 100% data validation, enhancing data integrity and user experience.
• Built secure e-commerce modules—including cargo booking systems and multi-user management—boosting operational efficiency.
• Optimized database queries and indexing strategies, reducing data retrieval times by 30% and enhancing performance.
• Integrated VB.NET and Crystal Reports to generate real-time analytics and reporting solutions for business insights.
• Collaborated with cross-functional teams to translate business requirements into scalable technical solutions.
• Implemented caching and API optimization techniques to support increasing transaction volumes and user demands.
Tech Stack: C#, ASP.NET MVC, SQL Server, Form Validation

DXC Technology
Web Developer
August 2021 - December 2022 (1 year 5 months)

• Developed responsive web applications using HTML5, CSS3, and JavaScript frameworks to ensure cross-browser compatibility and mobile-first design.
• Collaborated with UI/UX teams to create intuitive interfaces, increasing user engagement and satisfaction.
• Integrated back-end APIs with front-end components, streamlining data exchange and improving system efficiency by 15%.
• Implemented debugging and performance-optimization techniques, reducing page load times by 20%.
• Participated in Agile sprints and conducted thorough code reviews to maintain high coding standards.
• Supported the migration of legacy systems to modern web technologies, laying the foundation for scalable e-commerce functionalities.
Tech Stack: React.js, Node.js, Express.js, Redux, Tailwind CSS, JWT, AWS, MongoDB

Education

The University of Huddersfield
Master's degree, Computer Science · (January 2023 - February 2024)

Jawaharlal Nehru Technological University, Anantapur
Bachelor's degree, Engineering · (July 2017 - August 2021)
